LUA Pillar

**weCONNECT**

I believe relationships between students and teachers are the foundation of education. We really focus on building strong relationships and seeing the whole student which creates a community open to learning and growing together.

Why I  
Became  
an Educator

I have always enjoyed helping others and building relationships. I initially wanted to go into advertising but followed my heart instead and became an educator. Every year I get to grow and be a life-long learner with my students!
